

BHAGYASHREE MAHESH SAWANT

Quality Analyst

+91-8208856902 | bhagyashreesawant19@gmail.com | Pune, Maharashtra

LinkedIn: <https://www.linkedin.com/in/bhagyashree-sawant/> | GitHub: github.com/bhagyashree-sawant

PROFESSIONAL SUMMARY

Detail-oriented Quality Analyst with 4 years of end-to-end QA ownership across mobile, web, and enterprise platforms. Proficient in building automation frameworks (Playwright, Selenium, PyTest), API testing, performance testing, and CI/CD integration. Adept at leveraging AI-driven tools to accelerate test creation, improve defect detection, and enhance release quality. Combines strong analytical thinking with a high-ownership mindset to proactively identify risks and drive continuous quality improvement.

CORE COMPETENCIES

- ✓ End-to-End QA Ownership
- ✓ AI-First Test Automation
- ✓ API & Backend Testing
- ✓ GitHub / Cloud (AI)
- ✓ Playwright · Selenium · PyTest
- ✓ CI/CD Pipeline Integration
- ✓ Performance & Load Testing (JMeter)
- ✓ Risk-Based Testing Strategy
- ✓ Root Cause & Defect Analysis
- ✓ Agile / Scrum / BDD / TDD

PROFESSIONAL EXPERIENCE

Quality Analyst (QA Engineer)
Bhartiya Jain Sanghatana

May 2022 – Present
Pune, India

Project: Vivaah Verse | Mobile Application | Manual · Functional · Load · Security · Compatibility Testing

- Designed and executed 300+ test cases across functional, compatibility (multi-device/OS), security (data), and load testing domains, directly improving release cycle efficiency.
- Built automation coverage that reduced manual testing effort by 40% and cut error rates by 20%, demonstrating measurable QA ROI.
- Led defect review meetings with dev teams, enabling faster issue triage and resolution while improving overall software robustness by 15%.
- Tracked and managed defects end-to-end in Pro-Track, ensuring timely resolution and release readiness.
- Utilised AI Github Copilot to auto-generate playwright test script for critical obile user journeys

Project: RWB – Rejuvenation of Water Body | Enterprise Web Platform | Feb 2023 – Present

- Implemented Playwright-based test automation to generate and maintain robust test scripts with Allure reporting for transparent quality metrics.
- Conducted API and UI testing, along with cross-browser validation to ensure consistent behaviour across environments.
- Performed JMeter load/performance testing to identify system bottlenecks, contributing to measurable improvements in data processing efficiency.
- Prepared comprehensive test plans, test data, and reported weekly/monthly QA status to stakeholders.
- Logged and tracked defects in Pro-Track, ensuring documented root cause analysis and timely closure.
- Applied AI-assisted test generation(ChatGPT + Cloude + GitHub Copilot) to auto-produce PyTest regression script for data-pipeline validation

Project: Demand Generation | *Web Application* | *Dec 2023 – Present*

- ▶ Owned end-to-end test strategy: designed test plans, test scenarios, and executed both manual and automated tests against business requirements.
- ▶ Performed functional, regression, and security testing, ensuring compliance with quality standards before production deployment.
- ▶ Proactively identified edge cases and production risks, reducing post-release defect leakage by 15%.
- ▶ Collaborated cross-functionally with developers and product managers to clarify requirements and align quality gates.

AI-FIRST QUALITY ENGINEERING

- ▶ Leverage AI tools (GitHub Copilot, AI-assisted Playwright scripts) to accelerate test case generation, test data creation, and defect pattern analysis.
- ▶ Exploring self-healing locator strategies and visual validation approaches to build resilient, low-maintenance automation suites.
- ▶ Continuously evaluate emerging AI testing frameworks to enhance predictive risk identification and smarter coverage decisions.
- ▶ Actively building knowledge in agentic QA workflows and AI-driven regression triage to future-proof testing pipelines.

TECHNICAL SKILLS

Automation	Playwright, Selenium IDE, PyTest (Python), TestNG, PyCharm
API Testing	Postman – REST API validation, request/response testing, backend validation
Performance	Apache JMeter – load testing, stress testing, system performance analysis
Languages	Python (PyTest), Java (JDK-18), Selenium, SQL, JavaScript
Database	SQL, Mango DB
Bug Tracking	Pro-Track (Oracle), JIRA, Asana
CI/CD & VCS	GitHub, GitLab CI/CD – pipeline integration, version control
Methodologies	Agile (Scrum), Waterfall, BDD, TDD, SDLC, STLC
Security	Data security testing, OWASP concepts (familiarity)

CERTIFICATIONS & ACHIEVEMENTS

-  Python with Selenium Automation Tester Certification
-  Playwright Certification
-  Apache JMeter – Performance & Load Testing Certification
-  Agile Scrum Fundamentals Certification
-  GitLab Certification: Version Control & CI/CD

EDUCATION

Bachelor of Computer Application (BCA)
Shivaji Mahavidyalaya College

Percentage: 77.50%

2018 – 2021
Maharashtra, India
